

Reflection Wave Transmission System for Portable Devices

Easy access to data in battery powered portable devices (PD) from home AV systems or other consumer electronics equipment (e.g. TV, HDD recorder, AV car navigation systems, etc.)

- 1 Low power consumption: less than 30mW @portable devices
- 2 High data transfer rate: 20Mbps (uplink: PD →Reader)
2.5Mbps (downlink:Reader →PD)
- 3 Direct access to data in memory modules for independence with portable devices
